Participant Consent Form:

Virtual Turing Tumble User Evaluations - Unmonitored

The aim of this experiment is to investigate the usability of my web application which simulates a Turing Tumble board game online.

This survey should take roughly 30 minutes to complete.

The format of the survey will be during a recorded zoom meeting in which the user is asked to access the site hosting the virtual board game and complete a set of tasks, this will be followed by a usability survey using Google Forms. Participants will be expected to answer the questions on the form and submit these answers to be reviewed by the experimenter.

All results will be private. No personal information will be asked in the survey and no personal information stored about the participant.

If you choose to drop out, then all data will be discarded.

If you have any further questions about the survey, please contact:

Luke Gall

School of Computer Science

2298070g@student.gla.ac.uk

After completing, please send me your completed form using the email above and I shall send you the task specification and evaluation form.

I have read this information sheet, and agree to voluntarily take part in this experiment:
